

TEDI arendus

TEDI disainisüsteemi arendus ühendab komponentide loomise, testimise ja dokumenteerimise ning toetavad tööriistad ühtseks arendusprotsessiks.

KOOD

GitHubis asub TEDI lähtekood Reacti ja Angulari arendusraamistikele.

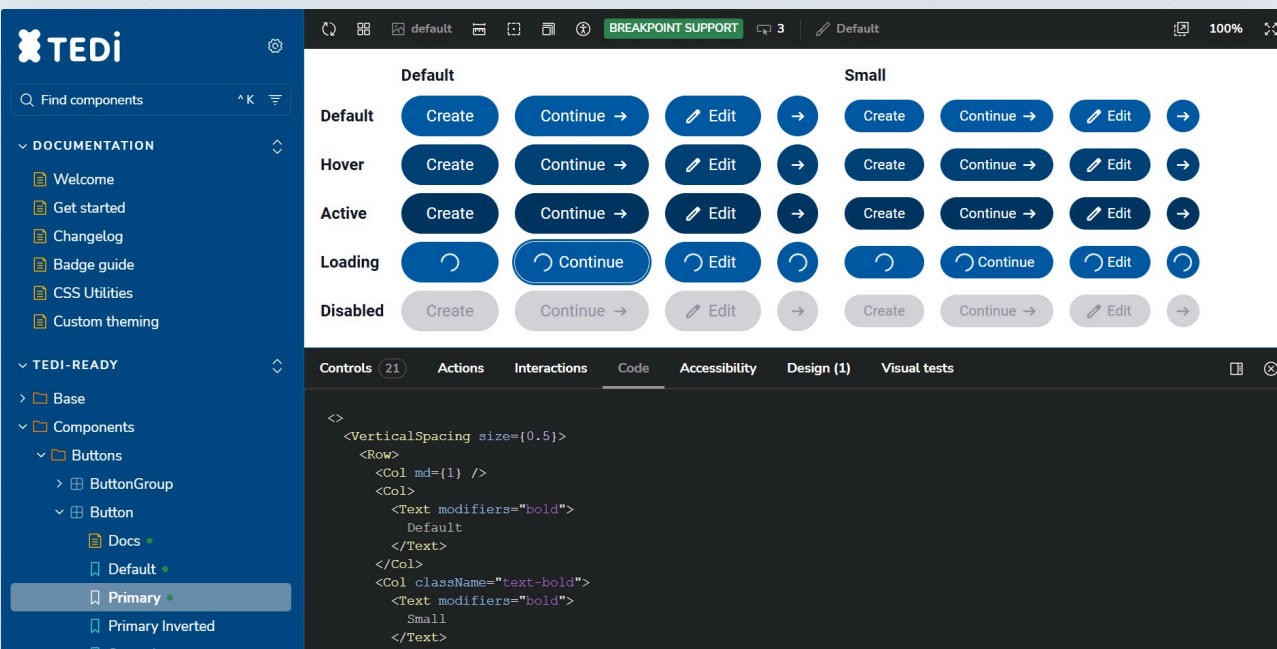

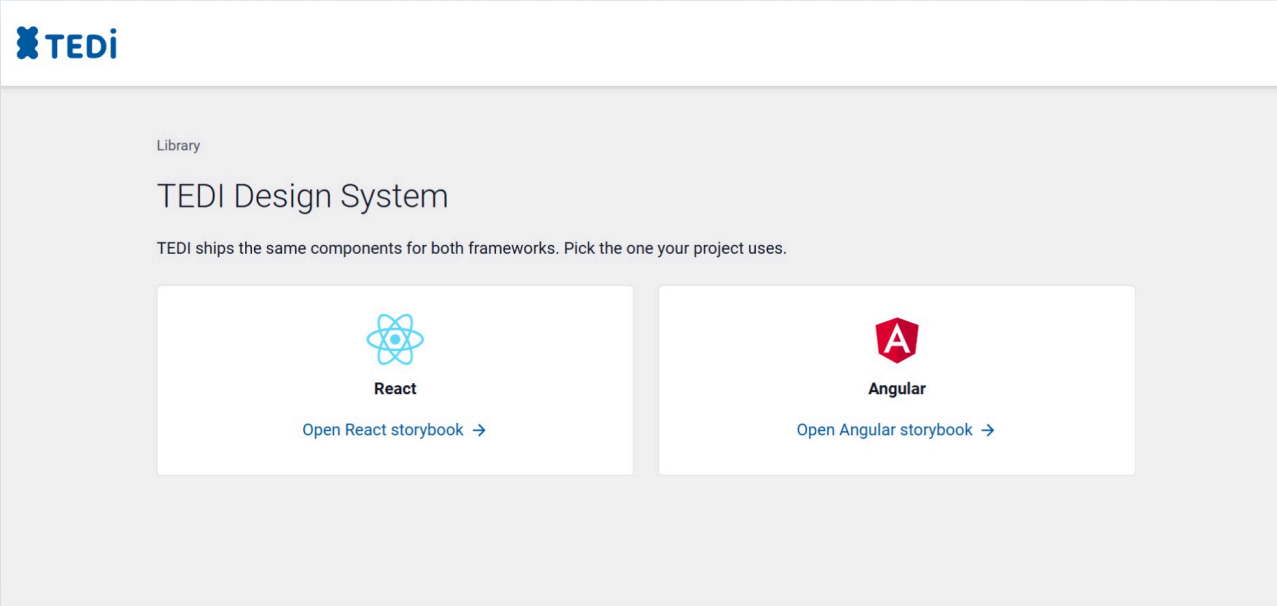

CODE

The source code for TEDI's React and Angular development frameworks is hosted on GitHub.

TEDI development

TEDI's development brings together component creation, testing and documentation, along with supporting tools, into one cohesive development process.

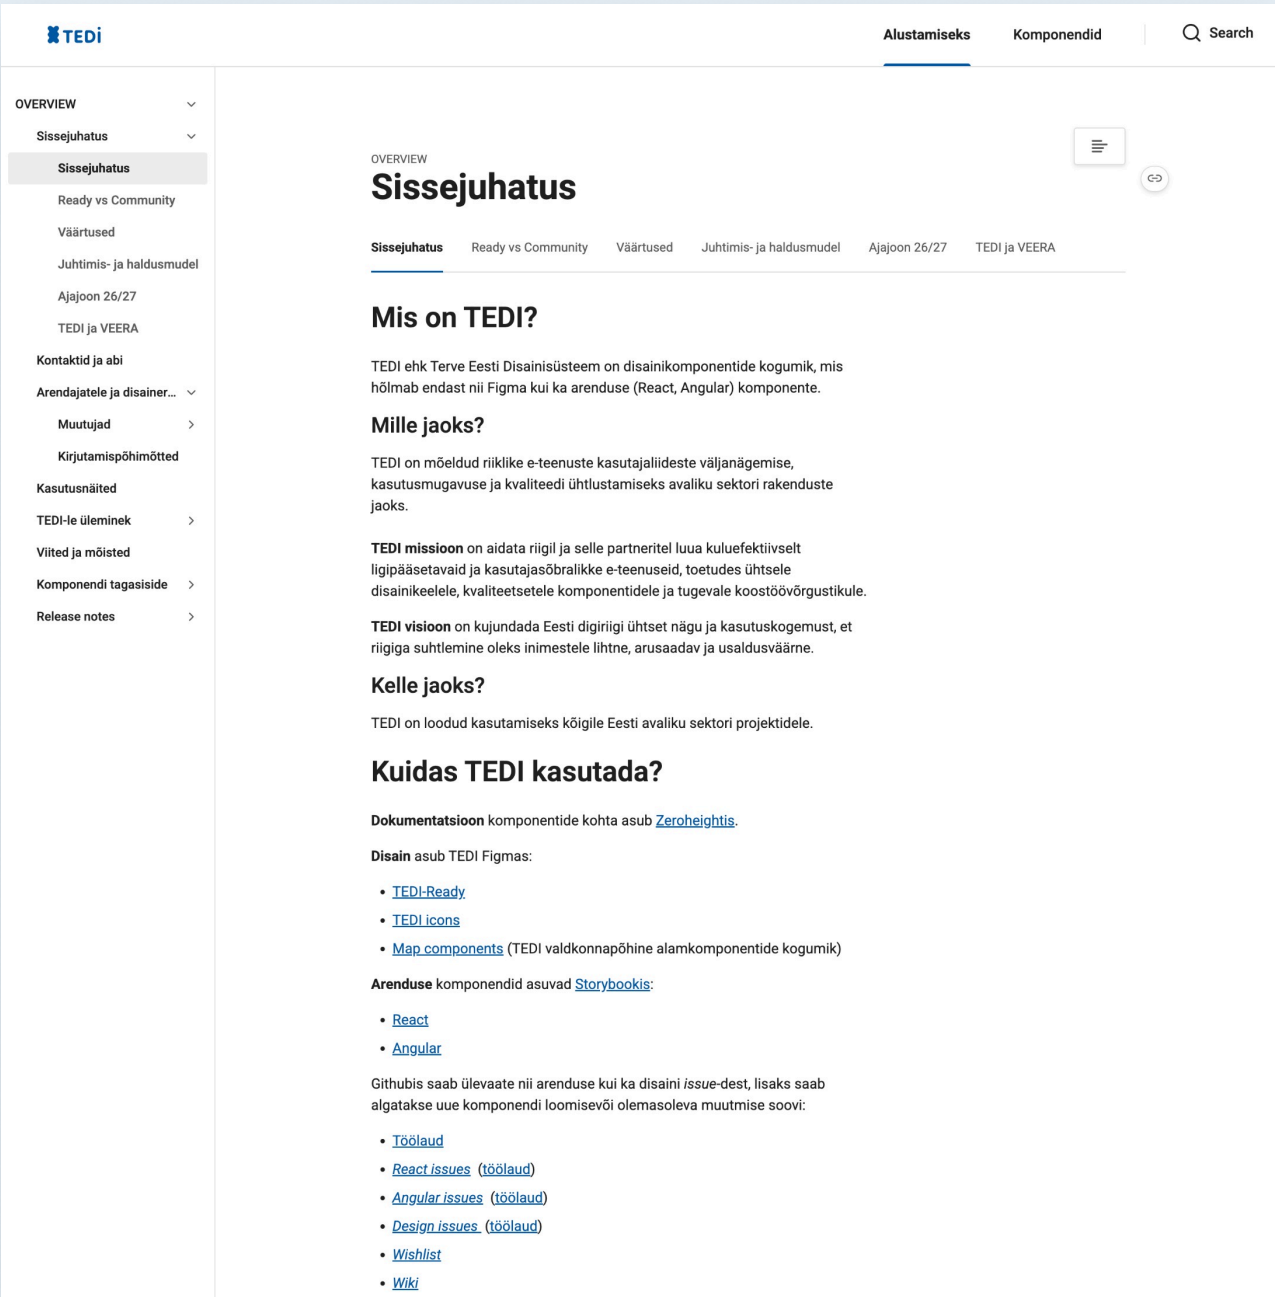

KOMPONENDID

Storybookis saab tutvuda TEDI komponentide variantide, olekute ja käitumisega ning neid arenduse käigus testida.

COMPONENTS

Storybook allows developers to explore TEDI component variants, states and behaviour and test them during development.

DOKUMENTATSIOON

Zeroheight koondab TEDI dokumentatsiooni, sh disainialused, komponentide kasutamise, ligipääsetavuse ja kirjutamispõhimõtted.

DOCUMENTATION

Zeroheight brings together TEDI documentation, including design foundations, component usage, accessibility and writing principles.
